

Red Rooster

STADTSHIP 70

Specifications

Builder: K&M Yachtbuilders
Design: Van de Stadt Design
Type : Stadtship 70

Principal dimensions

Material hull:	aluminium
Length over all:	21.00 m / 68.90 feet
Length waterline:	18.60 m / 61.02 feet
Beam:	5.10 m / 16.73 feet
Displacement:	29 ton
Water ballast:	2 x 1500 l
Draught:	2.90 m / 9.51 feet
Sail Area:	230 m ²
Options:	Carbon mast Park Avenue boom

Design

Van de Stadt designed a relatively narrow and light yacht with a long waterline, a flat underwater hull with a lead-ballasted bulb keel (2.90 m) and water ballast tanks (2 x 1500 l/ 2 x 396,17 gallons). These specifications, enhanced by a generous sail area of 230 m² and a carbon mast and Park Avenue boom, make for a fast sailing yacht.

Exterior and interior

The two cockpits are a distinctive feature on this yacht's deck. The "working cockpit" contains the steering wheel and the winches, halyards and sheets to sail the yacht. The other cockpit offers space to sit well-protected under the doghouse and enjoy the sailing. All halyards are led abaft below the deck from the mast to the working cockpit. The dinghy, with a length of 2.75 m, is stored behind a hatch in the transom. Inside, the yacht has accommodation for eight in four staterooms with three bathrooms. The owner's stateroom features an ensuite bathroom with a bath and bidet. There is a separate engineering area. The furniture is made from light, maintenance-free and scratch-resistant Formica combined with mahogany.
